PROJECTS

FARMER MERCHANT INTEGERATION

📅 08/2023 - 09/2023

This project provides common platform for the farmers and merchants on business level. This Farmer and Merchant integration or FM Integration will act as a mediator between two parties i.e. Farmers and Merchants. FM Integration is being used for procurement of many food products in an effective and efficient way.

FOOD ORDER SYSTEM

📅 02/2024 - 03/2024

The Food Order System is a dynamic web application developed using HTML, CSS, and JavaScript. Leveraging the power of these programming languages, the system provides an intuitive and interactive user interface for customers to browse restaurants, view menus, and place orders online.
